UvA SIG AI Handout

We're still in the wild west days of Gen AI, so it's impossible to provide a complete overview of everything that's out there. This handout is a preliminary guide to the tools mentioned during the SIG AI event that will stay relevant for at least the rest of 2024. Want to explore the more uncharted territories? Then follow the link to 200+ TikTok videos on unverified AI tools and applications at your risk, or search for "AI tool library" or "AI prompt library" to dive into the deep end of the pool.

Open AI Playground

Web-based tool that allows experimenting with various models from OpenAI.

Perplexity

AI-powered search chatbot with real-time answers and up-to-date information.

TLC Module

Learn more about the responsible use of GenAI at the UvA.

Anywyse

Create your own didactic audio-learning modules using genAI.

Copilot

Free version of ChatGPT-4 and DALL·E 3 by Microsoft.

History of Prompts

The history and evolution of prompt engineering since the 60's.

Prompt Engineering

A free online prompt engineering course.

AI Book

Book on living and working with AI in education (will be published on April 2nd).

Education Prompts

Useful prompts for educational purposes in English.
