Audiovisual System

Can't figure it out? Call facility services at 020-5251403 and ask for help with the AV.

Getting started

Press the 'ON' button' on the system. If the beamer doesn't respond, check with the remote if it is on.

Connect laptop to beamer

use an **HDMI- or USB-C** cable and press **the corresponding** button on the system. NB: In **G0.18b**: the 'video'-button for HDMI, the 'laptop' button for USB-C.

NB2: The 'PC' button has no use.

Main camera

Connect camera with standard USB-cable. The camera is pointed at the main screen area. It can be used live with Zoom, Teams, etc.

Electrical Table stuck?

Unplug table and wait 10 sec. Check if all other cables are well connected. Re-plug.

If that doesn't work: if table has power, press the 'down' button to lowest position. Then press down button again for 10 sec.

Still trouble? Mail to tlc-science@uva.nl

Group Screens

The TV- or MUTE-button controls the group screens. The main screen generally overrules the group screens.

NB: There is a short delay in the startup of the group screens.

Use a group screen separately?

Mute the main screen using TV or MUTE and plug a laptop with HDMI cable.

Green screens?

Turn main system off and on (reset)

Screen doesn't turn on, or doesn't start up after separate use?

Check the manual power-button: in the middle below the screen.
