# THE ETHICS CONVERSATION TOOL

# INGE VAN DER WELLE HUMAN GEOGRAPHY AND PLANNING contact: i.c.vanderwelle@uva.nl

#### INTRODUCTION

Fieldwork is essential for Human Geography students to develop ethical competence, yet it often falls short, with student reflections remaining superficial. Additionally, the assumed universality of fieldwork experiences is increasingly questioned in light of diversifying student backgrounds. This educational research project identified four key elements for fostering ethical competence: 1) understanding core concepts, 2) scenario-based practice, 3) field experience, and 4) reflective practice. These elements informed the design of the *Ethics Conversation Tool*, which guided and evaluated three interventions aimed at improving students' ethical learning in fieldwork contexts.

#### **METHODS**

# RESULTS

#### THE TOOL

# <u>INTERVIEWS</u>

5 students
6 lecturers
Goal: find common
ground, understand
challenges and
ethical dilemma's

#### <u>SURVEY</u>

Pre- and post

1 week fieldwork

55 students

Goal: identify
challenges, learning
outcomes and value
of fieldwork

#### FIELD DIARIES

14 assignments
Group work
6 students per group
Goal: understand
ethical decisions and
challenges

#### POST FIELDWORK EXPERIENCE

Figure 1 What are the first three things that come to mind thinking about research ethics? Student answers

"I can super understand feeling so very **out of place**, so very almost feeling **like an intruder** when you are just coming there to take a survey. I sometimes almost feel **like a criminal** just by walking into someone's yard to ring their doorbell."

### CONCEPTS

shared knowledge base repetition

## SCENARIO'S

Apply & integrate component skills and prior knowledge real experience based

## EXPERIENCE

Supportive course climate sufficient level of challenge targeted feedback

# REFLECTION

prompts collective & individual monitoring progress

Figure 2: Core elements and learning principles for ethics training in fieldwork activities

# Interventions in ethics training

- ✓ Collective reflection with clear prompts and structured comparison deepens the reflective practice. Recorded conversations instead of written reflections are promising as this is decreasing work pressure for students and teachers and will be further tested and evaluated.
- ✓ Guided teacher conversations and thematic analysis of field diaries help to establish a shared knowledge base and monitor how students apply and integrate this knowledge.
- ✓ Student experiences and narratives are crucial teaching material, for scenario-based practice and as pre-fieldwork information and can help students cope with (mental and physical) challenges.

of diverse students' assessment experiences. Assessment & Evaluation in Higher Education, 48(3), 403–417.
